

CMSC 479/679

Fall 2014

Dr. Cynthia Matuszek

1

My Research Topics

- **Robotics**
 - How can we go from industrial robots to useful robots in human environments? (Schools, cars, homes...)
- **Natural Language Processing**
 - How can computers learn to understand and speak human languages (English)?
- **Artificial intelligence**
 - How can we get computers to behave in ways that we would consider to be "intelligent?"
- **Human-Robot Interaction (HRI)**

2

2

Today: Intro & Overview

- Review of syllabus and schedule
 - Academic honesty
 - Expectations and conduct
 - Policies, grading, etc.
- Overview of Robotics and Topics
 - What is a robot? (And why is robotics so cool?)
 - What's the state of robotics now?
- What is 'intelligence'? Autonomy?

but
important

3

3

Resources

- The syllabus is longish, but important:
 - <http://tiny.cc/479-class>
- Lecture topics and reading on the schedule:
 - You'll want to check this every single class.
 - <http://tiny.cc/479-schedule>
- We will use Piazza extensively:
 - So get your account sorted right away!
 - <http://tiny.cc/479-piazza>
- **The class slides are intended to be the notes**

4

4

Classroom Policies

- Be courteous to classmates and instructors.
- No devices in use except when specified.
 - You don't learn as much.
 - People around you don't learn as much.
 - <http://tiny.cc/devices-in-class>
- No food in this classroom.

vectorstock.com, KSPprints.com

5

5

Harassment and Inclusivity

- All students are entitled to a safe, respectful, and inclusive learning environment both inside and outside the classroom.
- No discrimination, exclusion, or harassment
- Respectful, inclusive discussion
 - Use one another's preferred names, pronouns, etc.
- If there are problems
 - Talk to me, the TA, or someone else
 - There are resources on the syllabus

6

6

Grading

- Grades in Blackboard
 - Know your grades
but also
 - Keep track of what's left
- Grade questions:
 - 24-hour "cooling" period before any discussion
- Grade changes/regrades:
 - Requests to **professor and TA**
 - TA cannot change grades!

Homework: 20
Course project: 30%
Midterm exam: 15%
Final exam: 20%
Class participation: 15%

7

7

Participation

- Attend class.
 - The program (and I) expect you to be here for the entire semester.
- Speak up.
 - Ask & answer questions
 - Tell us your thoughts
- Be active on Piazza.
 - Ask and answer questions.
 - Post links to interesting material.
- Do any take-home quizzes and/or surveys.

8

8

5-6 Homework Assignments

- Written text, problem sets, and programming
 - Due at 11:59 PM the day before class
 - Late: 25% off /day
 - **If Blackboard says it's late, it's late.**
- Assignments will be turned in electronically
 - Assignment will specify Blackboard, forms, or email
 - Sometimes 10% penalty for not following instructions
 - Example: Wrong file type
- Questions? Piazza, then TA

These policies are firm. Please don't ask for exceptions.

9

9

Time Management

- Some things can be rescheduled
 - E.g., overlapping exams
 - If enough people have them
- Individual extensions may be given:
 - With reasonable cause
 - When made in advance
- Talk to me!

10

10

A Word About This Class

- The biggest complaint people have had:
 - *There's way too much math in this class!*
- Take it as a warning: modern robotics is mathy.
 - Linear algebra, calculus, probability
 - The second half will be much more mathematical than the first
 - This is not an easy class!
- You do not need hardware experience.

11

11

Reading

- Readings: Do these after class
 - More detail on concepts
 - You need to know the content!
- We use SNS more during the first half

CLASS	DATE	TOPIC / SLIDES	READING	HOMEWORK	HANDOUTS/NOTES/LINKS
1 (7)	Jan 28	Introduction and Overview		Read integrity policy Read integrity policy Sign up for Piazza Page	
2	Jan 30	Overview of Topics	SNS Chapter 1		
1 (7)	Jan 31	Module 1: Tools and Methods	SNS 2.1.1-2.2	SNS 1 journal: Cloning started	Please note: your first submission after this is due at 11:59pm.

12

12

Academic Integrity

- Instructor's responsibilities:
 - Be respectful
 - Be fair
 - Be available
 - Tell the students what they need to know
- Students' responsibilities:
 - Be respectful
 - Do not cheat, plagiarize, or lie, or help anyone else do so
 - Do not interfere with other students' academic activities

13

13

Summary and Links

- Before next class!
- Sign up for Piazza:
 - <http://tiny.cc/479-piazza>
- Read the syllabus:
 - <http://tiny.cc/479>
- Read the integrity policy:
 - <http://tiny.cc/479-integrity>
- Read SNS Chapter 1

14

14

Today in Detail

- Introduction and goals
- Review of syllabus and schedule
- Academic honesty policy
- Expectations
- Topics we'll cover
- What is a robot?

15

15

Goals of This Course

- Provide an overview of big problems in robotics
- Understand the elements of a robot system
- Get hands-on experience with robot software, hardware, and problem-solving
- Understand what robots can do now, could do better, and will be doing in future

16

16

Teamwork

- Projects will be done in teams of 4-5
- Teams will be assigned based on skills and interests
- Teams will:
 - Meet regularly
 - Do in-class *and* out-of-class group assignments
 - Share effort on project elements reasonably
 - Occasionally describe who's doing what

17

17

Academic Integrity

- I hate policing students. But... I take integrity very seriously.
 - Fabrication: Fabricating sources or any other information.
 - Aiding and abetting: Providing another student with answers, or helping them to cheat.
 - Plagiarism: Using a source (for code, blocks of text, images, or designs) without appropriate citations and recognition.
 - Copying: Using another student's work for an assignment, exam, or project without acknowledgment.
- You can do a LOT of collaboration in this class!

18

18

Integrity and Teamwork

- A lot of your grade involves teamwork.
- How can teamwork be unethical?
 - Not sharing the workload evenly
 - Not contributing to the group
 - Misrepresenting who did what
 - Working together on individual assignments
- Falsely claiming someone contributed to the group.

Don't make me handle a cheating case.

19

19

Expectations

- Attend class regularly
 - DO NOT come to class sick.
 - Make sure you follow up on the notes.
- Complete the assigned reading
- Participate
 - Participate actively in class discussions
 - Let other people participate, and listen attentively
 - Ask questions!
 - Read and post to the forum

20

20

Communications

- For help:
 - Post to Piazza (if appropriate)
 - Come to office hours
 - Email the TA (if appropriate)
- Email:
 - 24-hour cooling period
 - Always Cc the TA
 - *Email should include a link to your Piazza post.*

21

21

General Topics

- Overview and Concepts
- Sensing
- Actuators
- Control software
- Motors/motor control
- Locomotion
- Manipulation
- Kinematics
- Localization
- Motion planning
- Machine learning
- Hardware Design
- Cognition
- Human-robot interaction

22

22

Familiar Robots

Sentinel. X-Men, Days of Future Past: 2014

ED-209. Robocop: 2014

Wall-E: 2008

Data. Star Trek: TNG: 1987

Optimus Prime. Transformers: 2007-current

23

23

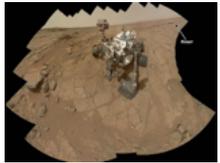

Some 21st century robots

24

24

What is a Robot?

"A robot is a reprogrammable, multifunctional manipulator designed to move material, parts, tools, or specialized devices through variable programmed motions for the performance of a variety of tasks."
[Robot Institute of America]

- Autonomous?
- Physical?
- Human-friendly?
- Humanoid?
- Sensory?
- Intelligent?
- Mobile?
- Manipulative?
- What else?

25

25

Robots Up to Now

- Robots now:
 - Expensive
 - Complex
 - Special-purpose
- Environments
 - Dedicated
 - Constrained
- Use and Management
 - Controlled by trained experts
 - Slow and expensive to reconfigure/repurpose

26

26

Robots Now

- As technology improves:
 - Smaller
 - Cheaper
 - More broadly capable
- Can consider deploying in human-centric environments
 - Homes
 - Schools
 - Care facilities
- Requires: flexibility and human-robot interaction (HRI).

27

27

What Should They Do?

- Robots are moving away from factory floors to...
 - Entertainment, toys
 - Homes (personal robotics)
 - Medical, surgery
 - Industrial automation (mining, harvesting, warehouses, ...)
 - Hazardous environments (space, underwater, battlefields, ...)
 - Roads
- Research Trends
 - Manipulation of everyday objects
 - Complex household tasks
 - Object recognition, mapping, interaction
 - Human robot interaction

28

28

What Subsystems Are There?

- Or: what does a robot need to know?
 - Where am I?
 - What's around me?
 - How am I posed?
 - How do I change it?
 - What do I want to do?
 - With respect to the environment?
 - Where do I go, and how?
 - What do I want to change?
 - How do I do that?
 - Who needs to be involved?
 - People? Other robots?

29

What Subsystems Are There?

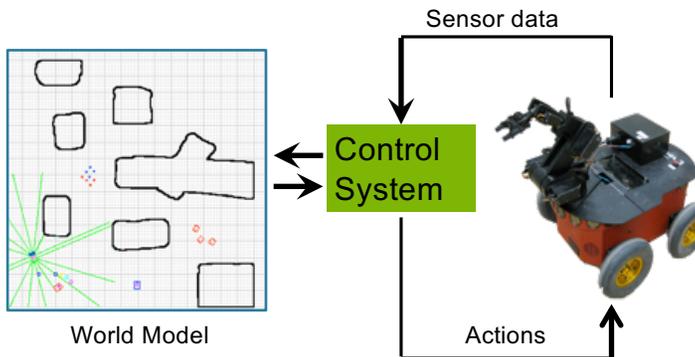

- Sensing
 - Perceiving the world
 - Creating a *world model*
- Actuation
 - Doing something in the (physical) world
 - Mobility, manipulation, ...
- Control
 - Navigation, motion planning, kinematics, dynamics
- Cognition and Learning
- Interfaces
